The LWGMS STEM program

Since 1998, Lake Washington Girls Middle School, located in Central Seattle, is a place where girls explore, experiment, discover, create, and learn about themselves and the world around them. Over their three years at Lake Washington Girls Middle School, L-Dub girls cycle through a core curriculum integrating the arts with science, technology, engineering, and math. Embedded in all disciplines is an emphasis on Design Education as a way of fostering fluency in creative and critical thinking skills to solve 21st century problems. Problem-solving, risk-taking, and mistake-making are necessary skills to practice, especially at the middle school level and especially for girls.
